FREE LIST

10 favorite family automations

Ten everyday family moments, and what a smart home does about each one.

Smart home, made easy.

Not affiliated with Home Assistant or the Open Home Foundation.

01 ARRIVE & LEAVE

Welcome Home Light

✕ WITHOUT Hands full, hunting for the switch.

✓ WITH The light comes on by itself.

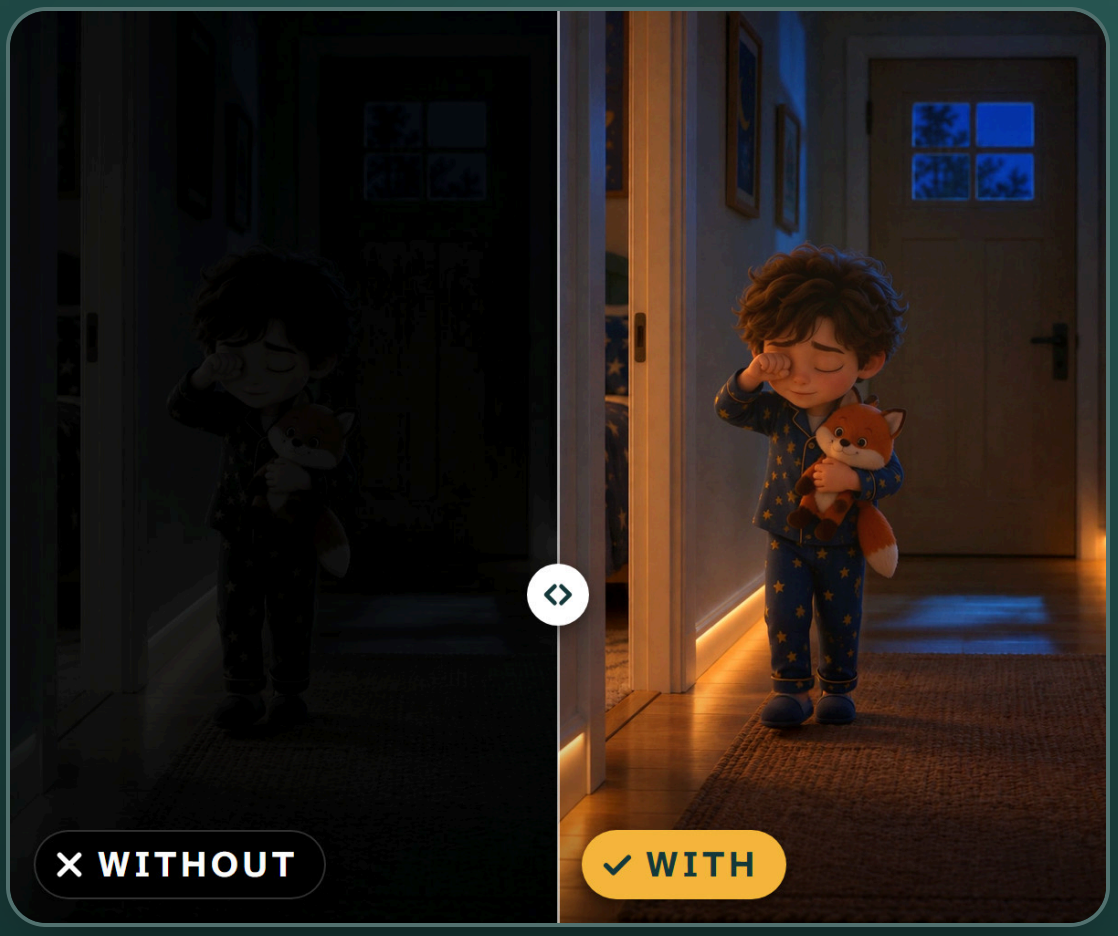

FOR THE FAMILY

Nobody comes home to a dark hallway. It works for everyone without opening an app, stays soft at night so it doesn't wake the house, and leaves alone any light someone switched by hand.

WHAT YOU NEED

A smart bulb or switch at the entrance, and everyone's phone.

Not affiliated with Home Assistant or the Open Home Foundation.

02 LIGHTS THAT BEHAVE

Night Path Light

✕ WITHOUT Pitch dark, or the big light at full blast.

✓ WITH A soft glow lights the way, then turns off.

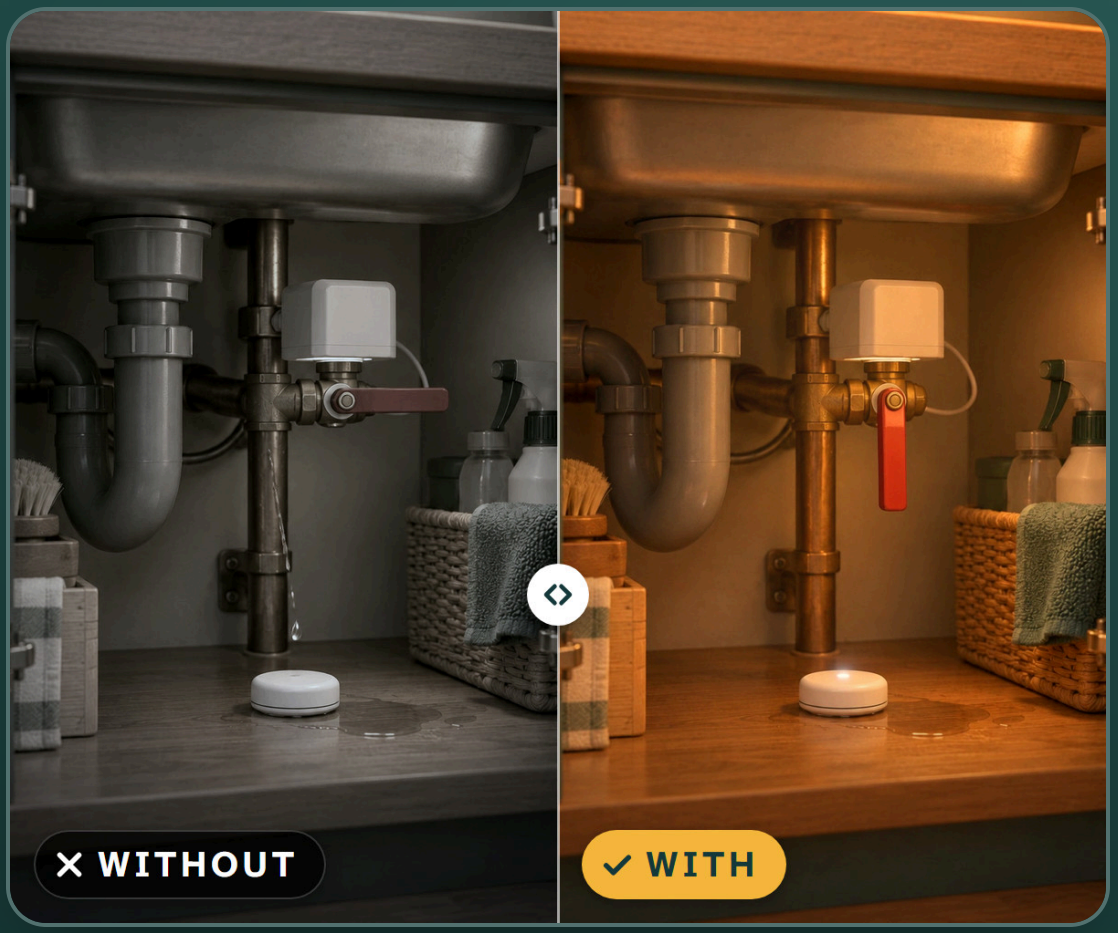

FOR THE FAMILY

Safe trips to the bathroom or kitchen at night, without blinding anyone. It’s never full brightness, it doesn’t wake partners or kids, and it does nothing during the day.

WHAT YOU NEED

A motion sensor in the hallway, and a bulb or LED strip that can dim.

Not affiliated with Home Assistant or the Open Home Foundation.

03 SAFETY & ALERTS

Water Leak Alarm

✕ WITHOUT — You find the puddle hours later.

✓ WITH — Every phone gets a message. The valve closes, if you have a smart one.

FOR THE FAMILY

You know about a leak in minutes, not when the ceiling stains. It’s the one alert allowed to wake people, and it stops repeating.

WHAT YOU NEED

A water leak sensor under the sink. A smart water valve is optional.

Safety automations add light and messages. They don’t replace certified smoke, CO or leak detectors.

Not affiliated with Home Assistant or the Open Home Foundation.

04 NIGHT & SLEEP

Goodnight Button

✕ WITHOUT A lap of the house to switch everything off.

✓ WITH One tap, and the house goes to bed.

FOR THE FAMILY

The same routine for everyone. It tells you what's still open, instead of failing silently.

WHAT YOU NEED

Smart lights, and a button on your phone or tablet. Door and window sensors are optional.

05 CLIMATE & ENERGY

Window Open, Heating Pauses

✕ WITHOUT You're heating the garden.

✓ WITH Heating pauses until you close it.

FOR THE FAMILY

No heating the garden, and the house goes back to normal by itself. A short airing doesn't trigger it, and it restores exactly what was set.

WHAT YOU NEED

A window sensor, and a smart thermostat or radiator valves.

Not affiliated with Home Assistant or the Open Home Foundation.

06 KIDS & GUESTS

Bedtime Countdown Light

✕ WITHOUT Bedtime negotiations. Five more minutes, then five more.

✓ WITH The kids' lamp turns amber as bedtime gets close.

FOR THE FAMILY

Kids see bedtime coming, with fewer arguments: a visual cue instead of a parent shouting the time.

WHAT YOU NEED

A color smart bulb in the kids' room.

07 NOTIFICATIONS THAT DON'T NAG

Laundry Done

✕ WITHOUT The wash sits wet in the drum for hours.

✓ WITH One message when the cycle is really done.

FOR THE FAMILY

One message and at most one reminder, never at night, never to an empty house.

WHAT YOU NEED

A smart plug that measures power, rated for your washing machine.

Not affiliated with Home Assistant or the Open Home Foundation.

08 MAINTENANCE

Filter & Salt Reminders

✕ WITHOUT The filter gets changed when someone remembers.

✓ WITH “Change the HVAC filter” shows up when it’s time.

FOR THE FAMILY

Home maintenance lands on the family to-do list, not on one person’s memory. It’s a task in a list, not a notification.

WHAT YOU NEED

No special device. Sensors are optional.

Not affiliated with Home Assistant or the Open Home Foundation.

09 MORNING ROUTINE

Breakfast Lights on School Days

✕ WITHOUT A dark kitchen on a school morning.

✓ WITH The kitchen is already lit when everyone stumbles in.

FOR THE FAMILY

It’s a soft light, and it keeps its hands off if someone changed it.

WHAT YOU NEED

Smart lights in the kitchen.

Not affiliated with Home Assistant or the Open Home Foundation.

10 MEDIA

Movie Time Lights

✕ WITHOUT Someone gets up to dim the lights. Again.

✓ WITH The room dims when the film starts, comes up a little when you pause, and goes back to how it was when it ends.

FOR THE FAMILY

It puts the lights back exactly as they were, with no flicker between episodes.

WHAT YOU NEED

A TV or media player that works with your smart home, and lights that dim.

Not affiliated with Home Assistant or the Open Home Foundation.

EveryHome

All ten are ready in EveryHome.

Together with 50 more: 60 ready-made automations in 10 groups of 6, built for the whole family. EveryHome is made to work with Home Assistant.
